PROJECTS

Banking Products | Ionic-Angular Developer

March 2022 – Present

- Creating loan applications for multiple banks of Saudi Arabia region which will allow the customer to apply for loan digitally. Customer can apply for loan from web, Android and iPhone.
- It's also contained the user identification from Saudi government website and digital contract signing.
- Included two factor authentication using OTP and call.
- Create Multi language applications to end users.

Matrimonial Application | Ionic-Angular developer

February 2021 – July 2021

- Created Matrimonial application which helps to find life partner. Users can register, login and able to search partners by there name.
- My role here to work on front end using Ionic framework and Angular.
- UI prototype design using Figma tool.
- We added one unique featured in app like "Trust score" allowed users to add more profs like bank statements, salary slips and driving license etc. With help of documents we provide Trust score in percentage. For documents verification process we created one admin panel also that verify documents manually.
- showing Active users status.
