Academic Projects

MCA Projects:

1. I have done a project on PHP , HTML & Bootstrap with MySQL. Developed a web application named Online Quiz Where the students or any of the users can take a test to check their skills. Here the users can given the test online and after submitting the calculated marks will be displayed. Also, The users can check his/her progress and the ranking compare to other users.
2. My 2nd project on .Net Framework and SQL, Name of Project is "Article-E" in that I have add some functionality's for users like creating a channel, Viewing posts of all writers, Subscribe to a channels, Searching of post, Making likes, Dislike and comments on posts. And for Admin side admin have privileges to delete and remove fake and unverified users, User verification done using Email ID only.
